# **Company Profile**

Jin Office Solutions is Mumbai (India) based Brand of Office Ergonomic Solutions. We aim to sell only Quality products. We are a sister concern of Arihant Infomatics (Since 1992) which is already a market leader for Display and Mounting Solutions. We founded this company in 2019 and are successfully running it to become another market leader. We believe in transparent mechanism, which has made us more trustworthy among our competitors in short time.

We offer a variety of Office Ergonomic Solutions like Height Adjustable Desks, Monitor Stands, Workstations, Laptop Risers and other Ergonomic Accessories.

#### **Experience:**

We are in this market of Ergonomic Office Solutions Since 2019 and our sister concern company since 1992, our products have been acknowledged by all major cities to even tier 2 and 3 cities of our country. Our products are known for its quality at an affordable price which keeps the supply chain smooth. This has made our Company No.1 when it comes to Height Adjustable Desks or Monitor Stands in India.

#### Stability:

Our company is a sister concern of very well recognized company Arihant Infomatics (Since 1992) which is known for reliability all over India. You can count on our financial strength, marketing reach and our well trained staff. We also assist in an end-to-end service and warranty.

#### Why Choose Us?

Competent pricing

3 years warranty

Widest range to offer

Exceptional Quality

# Why Ergonomics?

Office ergonomics refers to the science of designing the workplace to fit the user.

- Reduces the Risk of Musculoskeletal Disorders (MSDs): Poor ergonomics can lead to various MSDs such as neck pain, back pain, and carpal tunnel syndrome. By adopting ergonomic practices, one can reduce the risk of developing these disorders, which can ultimately lead to improved health and productivity.
- 2. Increases Comfort and Productivity: Ergonomic workstations are designed to be comfortable and reduce fatigue, which can lead to increased productivity. When employees are comfortable, they are less likely to take breaks or become distracted by discomfort or pain.

- **3. Reduces Absenteeism and Increases Turnover**: By implementing ergonomic practices, companies can reduce the likelihood of employees taking sick days due to MSDs. This, in turn, can lead to a reduction in absenteeism and turnover, saving the company time and money.
- **4. Improves Employee Morale:** By investing in ergonomic practices, companies show their employees that they care about their health and well-being. This can lead to improved employee morale, job satisfaction, and loyalty.
- **5. Meeting Legal Requirements:** Many countries have laws and regulations that require employers to provide a safe and healthy workplace for their employees. By adopting ergonomic practices, companies can meet these legal requirements and avoid potential legal issues.

In conclusion, office ergonomics is essential in the present work scenario because it can help reduce the risk of MSDs, increase comfort and productivity, reduce absenteeism and turn-over, improve employee morale, and meet legal requirements. By prioritizing ergonomic practices, companies can create a safer, healthier, and more productive workplace for their employees.

# **Quality Signature**

We only own quality products. Our Monitor Stands are not just a metal rod behind your Monitor, it is designed to hold much more than that for years and years. We provide strong built, the built you won't be finding anywhere else with a classy finish. Designed to provide great look and feel at competitive rates. Height Adjustable Desks are stable with good load capacity, ensures smooth transition from sit to stand. Our products carry devices strongly, protects them and are easy to install. Each product promises to deliver great experience.

# **Products Undergo Several Tests**

Life Test

Load Capacity Test

Safety Test

Transport Condition Test

# **Certified By**

# **How Do We Support Our Suppliers**

#### 1. We Provide All Marketing Resources:

Catalog or brochure customization. All product videos and HD photos.

#### 2. Ready Stock

With large warehousing capacity we can serve large quantities in less time.

#### 3. Demo Samples

Sell efficiently with our demo samples.

#### 4. Competent Pricing:

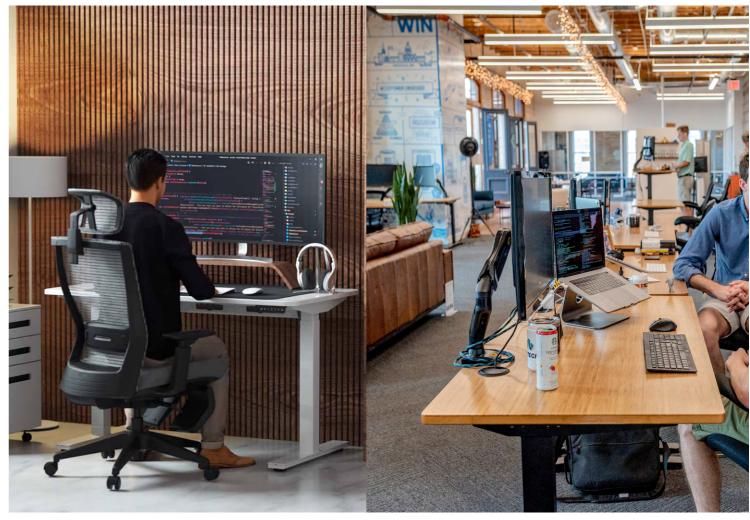

Reliable margins encourage suppliers to promote

#### 5. Non competing Attitude:

We never compete with our dealers ever.

#### 6. End-to-End Support:

We are always there to hear with any kind of issues even after sales and solve any query.

Working From Home Or From Office?

We got you covered!

# Height Adjustable Desks

A Height Adjustable Desk, also known as a Standing Desk or Sit-Stand Desk, is a type of desk that allows you to adjust the height of the work surface. This feature allows you to switch between sitting and standing while you work, promoting movement and reducing the negative effects of prolonged sitting. Height adjustable desks are available in a variety of styles and sizes, and some models may also include additional features like built-in storage, cable management systems, and more.

## Electric Height Adjsutable Desks

- More powerful and stable
- Adjusts height with a click of button
- Electric control
- Anti Collision feature
- Ideal for someone looking to adjust height more frequently
- Smooth transition

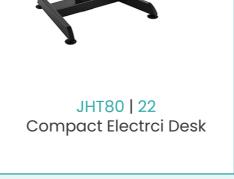

# Manual Height Adjsutable Desks

- Comes with a hand crank to adjust height
- Comparatively more affordable
- Easy Maintenance
- Stable legs and strong mechanism.

**Dual Motor Desk** 

JWS03-01 | 32 Desk Converter

# **Electric Desks**

It is a type of height adjustable desk that is powered by an electric motor. With the push of a button, the desk can be raised or lowered to a desired height, making it easy to switch between sitting and standing positions.

#### Points To Consider:

- Anti- Collision
- **Motor Type**
- Control Panel
- Column Segments
- Crossbars

Anti- Collision

This feature uses sensors to detect when the desk comes into contact with an object, such as a chair or a person, and will automatically stop and reverse direction to prevent injury or damage.

**Motor Type** 

- 1. Single Motor: Having 1 motor to power both lifting columns. Single-motor desks typically have a lower weight capacity and maybe slower to adjust than dual.
- 2. Dual Motor: Having 2 motor to power both lifting columns. Dual-motordesks are generally more powerful and faster.
- **Control Panel**

#### **Button Control Panel**

**Advanced Memory Controller** 

3 Memory Settings Timer Reminder

S CM/INCH Conversion

Column Segments

3 Stage enables greater height of the desk as compared to 2-stage.

Crossbars

Crossbar enables additional stability

# **DUAL MOTOR DESK**

Height Range	720~1220mm (28.3"~48")	
Power Input	100~240V	
Control Type	ButtonControl Panel	

# **Manual Desks**

It is a type of desk that can be raised or lowered to accommodate different users' heights or preferences. It typically has a crank or lever mechanism that allows the user to manually adjust the desk's height. Manual height adjustable desks are generally less expensive than electric height adjustable desks and require no electrical outlet or installation.

#### Points To Consider:

- Hand-Crank
- Hydraulic
- Column Segments
- Crossbars

Hand-Crank

Hand-Crank rotation allows height adjustment:

- 1. Desks with foldable: Hides the hand crank underneath the top.
- 2. Optional Side: Some desks provide customizable side to place hand crank.
- Hydraulic

Desks with hydraulic height adjustment mechanism allows to adjust height with a push of lever. This mechanism is similar to the mechanism in an ergonomic chairs.

Column Segments

All Manual Desks come with 2-stage column segment.

Crossbars

Crossbar enables additional stability

### TRIPLE MONITOR DESK MOUNT

### JMS70-C3

#### Articulating Mechanism

Triple screen bracket mounts three monitors on one single stand. Drilling and clamping optopns both are available in this triple screen bracket. The triple screen bracket is a great ergonomic tool for your workspace because it frees up your desk space The main use of a triple screen bracket is in stock markets and also in the gaming industry where a wide viewing angle is required. The three screens can also be aligned together in this triple screen bracket so that it looks as one single screen. The triple screen stand has a weight capacity of 7 kg per monitor and it can support three screens upto 27 inches each. This tough triple screen mount can resist rough usage because it is made of toughened steel .Full motion mechanism allows to move the monitors universally in all directions, making it easy to find the right viewing angle. Each joint can be tightened or loosened as well which makes the viewing angle perfect for the user. Height adjustment feature is also present which means the height of the 3 monitors can be adjusted to any length across the pole. There are a lot of cable clips as well which make the cables concealed and protected.
